

Quick Test

Safety with Simplicity

microPAT - THE simple to use PAT tester

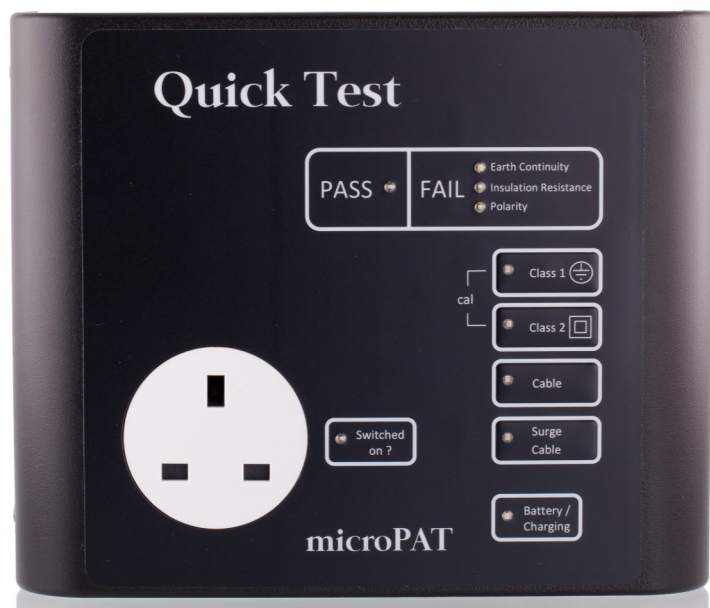

Portable. . .

- Lightweight
- Built in rechargeable battery

Simple to use. . .

One button 'Press To Test':

- Class 1 appliances
- Class 2 appliances
- IEC / extension leads
- Surge protected leads

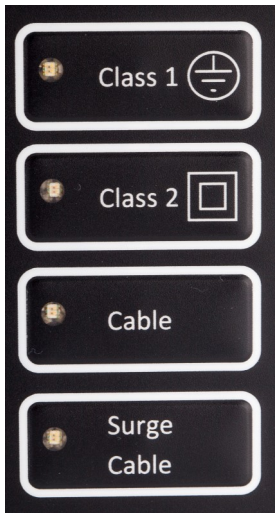

Feature Packed. . .

- Standard 500V insulation test, automatic 250V for surge protected leads
- Built in user calibration check
- Assesses standard and long extension leads
- Appliance 'switched on' checker

Users. . .

- Schools and colleges
- Shops and offices
- Charity shops
- Care homes
- Landlords
- Construction
- Village Halls / Community Buildings

The microPAT is simple to use, with just four buttons to select the required test.

- Simply press and release the appropriate test button
- Test results are displayed for ten seconds after the test is completed, the microPAT then shuts down automatically
- Job done!

The microPAT has *all* these features as standard, usually found on PAT testers costing much more. . .

- Standard 500V insulation test, automatic 250V for surge protected leads - Prevents 'false fail' results, a *must* for IT equipment users.
- Built in user calibration check - the IET Code of Practice recommends that in addition to formal calibration test instruments are checked at regular intervals.
- Assesses standard and long extension leads - provides clear indication to the user.
- Appliance 'switched on' checker - prompts the user to make sure the appliance switch is in the 'on' position.

The microPAT comes with:

- Comprehensive user guide
- Charger
- Test lead with pointed probe & crocodile clip
- Short IEC lead
- 50 tested labels
- 5 failed labels

The microPAT package comes with:
